

# T-Shirt Template Instructions

Note: T-shirt transfer supplies are available at office and craft supply stores.

1. Following the garment care labels, wash and dry the t-shirts to remove any finishes and to reduce shrinkage following the application of the iron-on.
2. Open the file named “t-shirt template.”
3. (Word Document only) If you want to make any changes to the text box above the *RACE Into Reading* image, double click on the text box to open it. The text is backwards so it will read correctly after being ironed onto a t-shirt. After you double click the text, a dialog box should pop up. From this box, replace the text with your own, if desired. When you are finished, press the “OK” button.
4. Print a test copy on plain paper. Hold the printout up to a window or light to see how it will look when ironed onto a t-shirt. Make adjustments to the size of the text box or image as desired. Once you are satisfied, print one copy on a iron-on transfer sheet for each shirt you need to make.
5. Following the instructions for your iron-on transfers, apply to the desired area on the shirt. Most instructions recommend trimming the printed design to the smallest size possible without disturbing the design before transferring to the t-shirt.
